Where are we now?

WISEST collaborates with industry, government, academia, and over 600 volunteers a year to deliver programs and networks that enhance the attraction, retention and advancement of women of all ages in science, engineering and technology, thus strengthening society by increasing gender diversity in the workplace. Several of our programs also target young men by providing information and experience in non-traditional careers including nursing and nutrition.

REGISTRATION DEADLINE
JULY 19th, 2010
